VDA

VDA Group is a leading international company specializing in the development and realisation of advanced solutions for integrated Room Management and Interactive Television systems, in the main for the international hospitality industry.

With more than 250,000 rooms active in some of the world's most prestigious hotels, for more than 40 years we have been working with leading international hotel brands, confirming our position as a technical partner for tailor-made solutions created to improve the guest experience.

The distinguishing features of the Group that contribute to consolidating its leading position in the market, are its technological expertise and system flexibility, coupled with its 100% Italian design, its originality, and its care.

VITRUM

The Glass Collection

Vitrum is the line of Smart Devices designed using innovative methods and materials. Use of an innovative as much as ancient material such as glass makes for a stimulating tactile perception and high profile sensorial impact.

VITRUM

Glass, essential lines, luminosity and harmony, transform simple switches into items of design with an absolutely unique aesthetic and functional identity. The design is exceptionally versatile and can be personalised with different colours, icons and screen prints.

VITRUM

AXIA

The Metal Switch Collection

Our prestigious collection designed to give architects multiple choices of metal finishes to unleash the power of their imagination. Axia has great aesthetic potential provided by the possibility to coordinate the two elements making up the device, namely the magnetic plaque, and the support anchored to the wall.

AXIA

The faceplate can be chosen between the finishes starting from a support and nickel-plated aluminum buttons. Choose among the main options:

Brushed Stainless Steel (standard), Bronze Brass Matt, Bronze Brass Polished, Bronze Copper Matt, Flamed Brass Matt, Gold Champagne Matt, Burnished Matt Black, Matt Brass.

DUETTO

The Boxless Solution

Duetto combines the power of Micromaster and the Vitrum design with the versatility that only a boxless solution can offer.

DUETTO

CHARACTERISTICS AND PERSONALISATIONS

Duetto is the new device range designed and developed by the **VDA Group**.

Its independency from the need for wall back boxes, and its multiple functionality available in two simple devices, make it a unique easy-to-install solution, where cabling costs and building works are drastically reduced. Thanks to the high level of customization inherited from the Vitrum collection, it is possible to choose just one of the two elements and combine it with any device from the VDA catalogue, achieving a perfect aesthetic combination.

It is also the perfect solution for renovations, integrations, and special projects such as Camping and Mobile-Homes. In its IP54 version, Duetto Outdoor becomes the solution for Outdoor Gates or in areas with a high level of humidity. Within the package there is a frame whose holes allow the anchoring and hiding of Italian, English and German junction boxes.

DUETTO

A/C CONTROL AND SERVICES

- || Customisable Aesthetics
- || Temperature and Room facilities control
- || White alphanumeric display
- || RFID Card Holder with backlit guide (RGB)
- || Integrated temperature and humidity sensors
- || Backlit Hotel logo (RGB)

ACCESS CONTROL

- || Customisable Aesthetics
- || Smart RFID Card reader
- || Room Facilities Indication and Doorbell button
- || Backlit Room Number (RGB)
- || Available in IP54 version

DUETTO

CLASSIC

The Modular Solution

Our traditional Classic collection that fits into most of the 3 Module Italian Manufacturers modular range (BTicino, Vimar, Gewiss, Ave, etc) and our Vitrum Collection.

CLASSIC

SYSTEMS

ETHEOS

Etheos is the new cloud-based platform, designed by VDA, created to improve room control in a hotel environment (a Room Management System). The new system provides a wide range of functionality, allowing the management of the hotel in an integrated way, ensuring both energy and resultant cost savings.

MICROMASTER

Our Micromaster system can be expanded and integrated with a wide catalogue of expansions and gateways to achieve any kind of integration with HVAC manufacturer, lighting protocol or door lock systems.

LIGHTS CONTROL

2ch Phase Dimmer

4ch Phase Dimmer

MUX 4 ON-OFF ZC

MUX 4 ON-OFF

DMX - DALI Gateway

PWM - CV & CC & RGB

The VDA devices are able to control almost any kind of light, whether it requires a simple on / off control, or whether it has dimming control. For solutions that use spotlights or strip LED's, our series of PWM control devices allow you to avoid the use of expensive drivers.

A series of gateways to **DMX and DALI protocols** are also available.

ACCESS CONTROL

The hotel's access control system has become even more crucial for the accommodation facilities.

The three typologies of VDA's access system guarantee maximum security and the ability to remotely monitor the presence of staff and guests at any time.

ENTERPLEASE

1. EnterPlease App

2. PIN Code

3. RFID Card

Every access is recorded on VDA's smart router providing a complete log of each guest.

ENTERPLEASE

KEY MANAGER

EnterPlease Key Manager provides the operator with the ability to enable room access for their guests through their own mobile devices.

In addition, the front office can generate Mobile Keys/PIN Codes remotely, without actually being within the facility, by accessing the EKM platform through a smartphone or browser.

EnterPlease App

The latest generation of technology for access control is the one that **combines** the traditional RFID key with a digital one using Smartphone **BLE (Bluetooth Low Energy)** technology.

EnterPlease is the app for both iOS & Android phones that allows the guest to access their room and common areas, avoiding queues at the front desk.
